1. Welcome to Infovance Technologies

Welcome aboard! This guide is designed to help you settle in quickly and become a productive, confident member of the Infovance family. Founded in 2015, Infovance Technologies is a mid-sized IT services and consulting company headquartered in Noida, Uttar Pradesh, serving enterprise clients across banking, manufacturing, retail and healthcare. With around 800 colleagues across our Human Resources, Information Technology, Finance and Engineering departments, we pride ourselves on engineering excellence, integrity and a culture of continuous learning. Over the coming days, your manager, your buddy and the HR team will guide you through everything you need to start strong.

Our way of working is grounded in a small set of values. **Integrity** means we are honest with clients and colleagues and do the right thing even when no one is watching. **Craftsmanship** means we care about the quality of what we build and favour deep understanding over shortcuts. **Ownership** means we follow problems through to resolution rather than passing them along. **Respect** means we listen, assume good intent, and value the diverse backgrounds of our colleagues. **Learning** means we stay curious and help one another grow. You will see these values reflected in how we run meetings, give feedback and make decisions, and you are encouraged to hold us to them from your very first week. Your onboarding buddy is your informal go-to for the small questions that do not warrant a formal ticket — from where to find the best coffee to how a particular tool is used day to day.
